Tomás Pablo Korenblit

tomaskorenblit at gmail.com | tomas at baish.com.ar | tkoren.com

Education

Universidad Nacional de San Martín 2022 – 2027 (expected)
BSc Data Science (GPA 8.64 / 10)

Publications

PowerBench: Measuring Language Model Bias in Power-shifting Requests 2026
N. Martorell, W. Brau, G. A. Heredia, T. P. Korenblit, G. Labastié, T. Gimenez Molina
arXiv preprint arXiv:2610.02303 Preprint

- Evaluates 24 models across eight languages and human/AI-agent requesters
- Finds nationality biases and greater refusal when AI agents seek power

Counterfactual Resampling to Analyse Model Behaviour 2026
T. P. Korenblit
BlueDot Impact Technical AI Safety sprint, facilitated by BAISH writeup repo

- Extends Betley et al.'s Value Leakage introducing per-conversation measurements by resampling truncations of the CoT under a flipped prompt
- CoTs that deny being influenced do not concentrate on the influenced traces, against the hypothesis that the model selectively covers its tracks

Not All Instructions Are Forgotten Equal 2026
T. P. Korenblit
Memorias de las 55 JAIIO (ASAID) paper repo

- Measures retention of in-context instructions individually in multi-turn coding sessions
- Per-instruction effects range from -2.4 to +5.4 log-odds and only three of twelve instructions benefit from being restated

Experience

AISAR Oct 2026 – Present
Research Fellow (part-time)

- Research on white-box AI control.

Independent Research Apr 2026 – Present

- Research on AI Safety. Interests: scalable oversight, interpretability.
- Facilitator for BlueDot Impact's Technical AI Safety course
- Contributor to Alineados, BAISH's Spanish-language AI safety newsletter.

Ascendancy | *Data Scientist* Jan 2026 – Apr 2026

- Built a graph database of investors, founders, and companies across the Americas, MENA, and Europe, with warm-intro pathfinding and community detection
- Wrote an assistant to turn English into Cypher, so non-technical users can query the graph directly (Python, Neo4j, PostgreSQL, FastAPI, GCP)

Invisible Technologies Dec 2022 – Dec 2025
Software Engineer (Jun 2025) | *QC Data Analyst* (Jun 2023) | *AI Data Trainer* (Dec 2022)

- Designed a RAG platform to create almost all RLHF annotation interfaces
- Wrote validation scripts and dashboards (Python, Looker) used company-wide. Reviewed output quality for the RLHF data teams

Klouser | *Data Scientist / Data Engineer* Dec 2021 – Oct 2022

- Made a lead generation system and trained a classifier for client profiles (Python, Pandas, PostgreSQL, Scikit-learn)
