

EDUCATION	Universidad Nacional de San Martín BSc Data Science (GPA 8.64 / 10)	2022 – 2027 (expected)
PUBLICATIONS	Counterfactual Resampling to Analyse Model Behaviour T. P. Korenblit <i>BlueDot Impact Technical AI Safety sprint, facilitated by BAISH</i> writeup repo – Extends Betley et al.’s Value Leakage introducing per-conversation measurements by resampling truncations of the CoT under a flipped prompt – CoTs that deny being influenced do not concentrate on the influenced traces, against the hypothesis that the model selectively covers its tracks Not All Instructions Are Forgotten Equal T. P. Korenblit <i>JAIIO 2026 (ASAIID)</i> paper repo – Measures retention of in-context instructions individually in multi-turn coding sessions – Per-instruction effects range from -2.4 to +5.4 log-odds and only three of twelve instructions benefit from being restated PowerBench: Measuring Language Model Bias in Power-shifting Requests N. Martorell, W. Brau, G. A. Heredia, T. P. Korenblit, G. Labastie, T. Gimenez Molina <i>arXiv preprint arXiv:2610.02303</i> paper – Evaluates 24 models across eight languages and human/AI-agent requesters – Finds nationality biases and greater refusal when AI agents seek power	2026
EXPERIENCE	Independent Research – Research on AI Safety. Interests: scalable oversight, interpretability. – Facilitator for BlueDot Impact’s Technical AI Safety course Ascendancy <i>Data Scientist</i> – Built a graph database of investors, founders, and companies across the Americas, MENA, and Europe, with warm-intro pathfinding and community detection – Wrote an assistant to turn English into Cypher, so non-technical users can query the graph directly (Python, Neo4j, PostgreSQL, FastAPI, GCP) Invisible Technologies <i>Software Engineer</i> (Jun 2025) <i>QC Data Analyst</i> (Jun 2023) <i>AI Data Trainer</i> (Dec 2022) – Designed a RAG platform to create almost all RLHF annotation interfaces – Wrote validation scripts and dashboards (Python, Looker) used company-wide. Reviewed output quality for the RLHF data teams Klouser <i>Data Scientist / Data Engineer</i> – Made a lead generation system and trained a classifier for client profiles (Python, Pandas, PostgreSQL, Scikit-learn)	Apr 2026 – Present Jan 2026 – Apr 2026 Dec 2022 – Dec 2025 Dec 2021 – Oct 2022
